4. English Phrasal Verbs

Phrasal verbs are new expressions (with their own meaning) formed from a verb and a particle (a preposition or an adverb). They are the English equivalent of German compound verbs (auf-hören, ver-standen, etc.).

Examples: give + up ↔ aufgeben get + on + with ↔ auskommen + mit

Like in German, some of them can be separated, some cannot. When a phrasal verb has an object, a **noun object** usually follows the phrasal verb, and a **pronoun object** splits it up:

Examples: give up smoking (noun) try on this jacket
give it up (pronoun) try something on

In the list below, those phrasal verbs that can be split up by a pronoun-object are marked with a smaller (sb) or (sth) in brackets. The others cannot be split up.

Prepositions of Time and Place

Prepositions are a word class like nouns, verbs and adjectives. There are more than 100 prepositions in English. Although many prepositions have several functions, all of them link parts of sentences, and most have a simple, basic meaning that has to do with a relationship in time or space.

Prepositions of time: When?

Prepositions that express points in time and periods of time are very regular in their meaning and use.

	2011 the spring May the morning	(years) (seasons) (months) (times of day)
	Monday Tuesday morning 15 May my birthday the weekend (US)	(days) (day + time of day) (dates) (special dates)
	Easter one o'clock teatime the weekend (UK) night	(festivals) (specific times of day) (meal times)
at one o'clock		Lunch is at one o'clock.
about one o'clock		Can you be there about one o'clock?
before one o'clock		I have to ring her before one o'clock.
after one o'clock		You can come round after one o'clock.
by one o'clock		I need to finish by one o'clock.
until one o'clock		I'll be out until one o'clock.
since one o'clock		I've been here since one o'clock.
from one o'clock		You can ring me from one o'clock.

Periods of time: "for", "during" and "in"

Remember that **for** is used to talk about general periods of time in the past, present and future.

I worked here for six months .	
I have worked here for six months .	
I am working here for six months .	
I'll be working here for six months .	

The preposition **during** is used when something happens within a certain period of time. Don't say **during six months**.

- It rained a lot **during the night**.
- He worked in a bar **during the summer**.

In both the above sentences, you could use **in** instead of **during** to talk about the period of time. But you must use **during** if the focus is on an activity or experience, rather than a general time period:

- He met Louise **during his internship**.
- We visited Leeds Castle **during our holiday in England**.

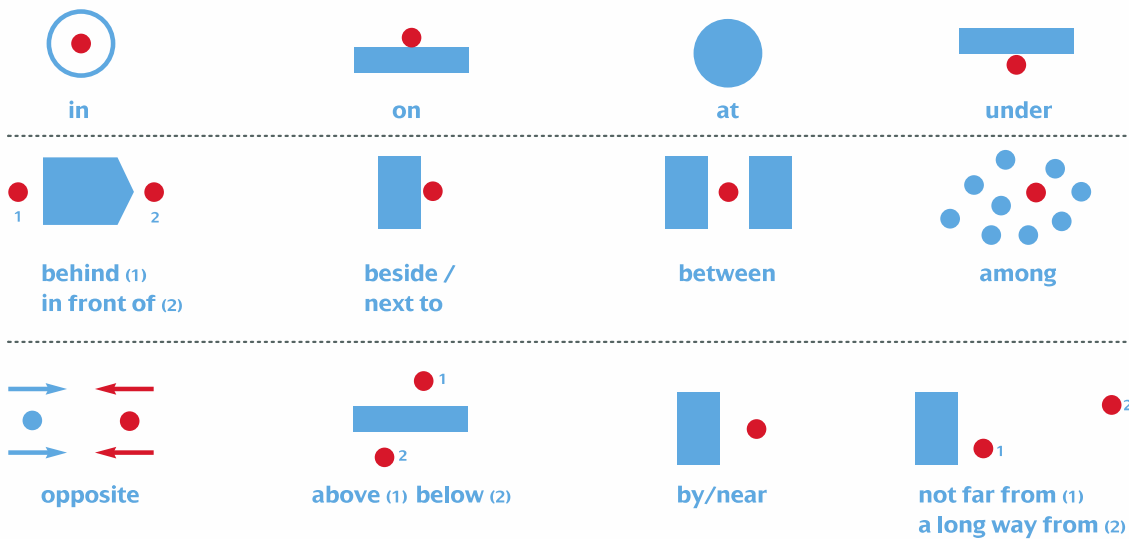

Remember that many time expressions do not need a preposition. Here are some examples:

- She'll phone **this afternoon**.
- I saw her **last week**.
- Let's go out **one evening soon**.

Prepositions of place: Where?

Prepositions that express relations in space are very regular and can be shown simply using diagrams like those below.

 in	She lives in Scotland. (countries) He works in Bristol. (cities, etc.) The house is in Rose Lane. (UK) (streets) I saw her in the restaurant. (buildings) There's a pen in the drawer. (containers)
 on	I met her on the plane. (public transport) We live on the sixth floor. The house is on Newman Road. (US)
 at	He lives at 42 Old Street. (an exact point or place) I'll meet you at the cinema.

a long way from

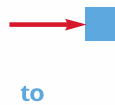

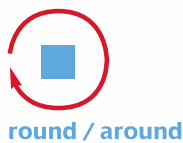

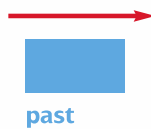

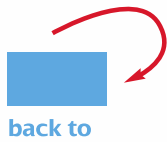

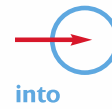

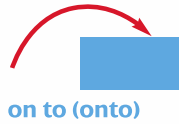

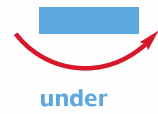

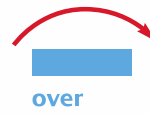

I keep it **under** the bed.
 There's a cupboard **behind** the door.
 There's a garden **in front of** the house.
 Let's have a picnic **beside** the lake.
 We live **next to** the church.
 The girl stood **between** her mother and father.
 The cat was asleep **among** the papers on the desk.
 The office is **opposite** the bank.
 Our office is **above** a coffee shop.
 The coffee shop is **below** our office.
 I met her **by** the fountain.
 We live **near** a school.
 We live **not far from** the church.
 The village is **a long way from** the train station.

The prepositions **at**, **by**, **for**, **in**, **of**, **on** and **with** are among the 20 most commonly used words in English.

Prepositions of movement: Where to?

Prepositions that express movement to or from a point in space are shown in the diagrams and examples below.

up
down
over

On my last flight, we flew right **over** the mountains.
I think the ball has just rolled **under** the sofa.
The girl climbed **on to** the chair.
The photograph fell **off** the shelf.
The man got **into** the car and drove off.
I need to get something **out of** my bag.
You'll have to go **back to** the shop and buy one.
We drove **past** the new supermarket.
I like driving **through** the city on Sundays.
We walked **along** the beach looking for shells.
The class ran **around** the field four times.
The dog ran **to** the gate to greet the visitor.
The man walked slowly **towards** the door.
I'll just walk **across** the road to the bakery.

Metaphorical senses

Many prepositions, especially prepositions of place and movement, also express more abstract or metaphorical meanings.

- Her height is **above** average for her age.
- Just do your best. You know we're **all behind** you.
- Are you **in love**?
- Is he **out of his mind**?
- He's great. She's definitely **on to a good thing** with him.
- I hope that coffee will help me **get through** my exams.

Most prepositions are single words. Some pairs and groups of words, however, function like single prepositions. We have already met a number of them as prepositions of place and movement; for example: **back to** and **in front of**. Here are ten more:

apart from
as well as
because of
except for
in exchange for
in favour of
in spite of
instead of
such as
thanks to

I've done all the packing **apart from** my hand luggage.
Are we going to visit the castle **as well as** the museum?
We were late **because of** an accident on the motorway.
I think we're all here **except for** Justin.
I'll help you in the garden **in exchange for** a back massage.
We're not really **in favour of** the new building plans.
She came to work **in spite of** a bad cold.
Why don't we have potatoes **instead of** rice?
Try to eat lots of green vegetables **such as** broccoli and spinach.
Thanks to his fitness programme, Ben has lost a lot of weight.

Prepositions in partnership

Many prepositions combine with nouns, verbs and other word classes. These combinations are often different from the German and simply have to be learned:

afraid of
divide into
enough of
explain to
good / bad at
married to
pay for

I'm **afraid of** heights, so skiing's not for me.
How about **dividing** your talk **into** three parts?
I've had **enough of** your complaining!
Can you **explain to** me how the fax machine works?
My son is **good at** maths, but **bad at** languages.
She was **married to** her first husband for six years.
We'll provide the food, but we ask you to **pay for** your drinks.

When a preposition comes before a noun or noun phrase, it makes a **prepositional phrase**:

- Rosie's chocolate brownies are the best **in the world**.
- I was just listening to a lovely concerto **by Bach**.
- Shall we go **for a swim**?
- Please write your answers **in pencil**.
- The party starts at 4 p.m. I hope we'll be **in time**.
- The talk will start at 1 p.m. Please be **on time**.
- I heard it **on the radio**.

Prepositional verbs consist of a verb and preposition. The direct object always follows the preposition.

belong to
deal with
depend on
get on / off
listen to
look after

That dress **belongs to** that doll.
Would you know how to **deal with** an emergency?
She **depends on** her sister to do her shopping.
Get off at the next stop and wait for the number 2 tram.
I don't like **listening to** music in the morning.
Do you need someone to **look after** your plants?

Prepositions and adverbs

Q: When is a preposition not a preposition? **A:** When it's an adverb.

What's the difference? A preposition always has an object. Many prepositions, such as **around**, **before**, **opposite**, **past**, **out** and **up** also belong to the word class of adverbs, which usually stand alone.

- We drove **around** the town looking at the sights. (preposition)
- I drove **around** looking for a parking space. (adverb)
- Have you looked **in** the fridge? (preposition)
- We stayed **in** last night. (adverb)

We hope that **thanks to** this pull-out, you will no longer need be **afraid of** prepositions. Keep this brochure **beside** you **at work**, stick it **on** the wall, show it **to** your friends, and soon you'll be really **good at** this area of grammar.

8. Adjectives and Adverbs

Adjectives: words that qualify a noun or a pronoun

Comparison of Adjectives

Shorter adjectives follow the	GERMAN PATTERN	<i>big – bigger – biggest</i>	
Longer adjectives follow the	FRENCH PATTERN	<i>beautiful – more beautiful – most beautiful</i>	
2-syllable adjectives:	GERMAN PATTERN	<i>-y / -ly / -ow / -le</i>	e.g. <i>friendlier</i>
	FRENCH PATTERN	<i>-ful / -ed / -ing</i>	e.g. <i>more helpful</i>
The particles we use to compare things are:		as big as	as beautiful as
		bigger than	more beautiful than
		less big than	less beautiful than
		the biggest of/in	the most beautiful of/in
careful:		<i>this is the same as the other one</i>	

Participles: Active / Passive Adjectives

Adjectives can be made from verbs:	to tire	→	tired / tiring
	to bore	→	bored / boring
	to surprise	→	surprised / surprising

The **PAST PARTICIPLE (-ed)** of the verb usually describes a **person's feelings** ('I was bored').

The **PRESENT PARTICIPLE (-ing)** of the verb usually describes the **situation** that created these feelings ('It was a boring film, so I was bored').

Adverbs: words that qualify anything else

Adverbs are formed from an adjective by adding the ending -ly. Careful with the spelling:

-l + ly →	-lly	normal →	normally	Special cases:	
-ic + ly →	-ically	tragic →	tragically		
-e + ly →	-ely	sincere →	sincerely		hard → hard
-y + ly →	-ily	easy →	easily		fast → fast
-le + ly →	-ly	terrible →	terribly		good → well

Adverbs taken from adjectives are generally used in three different situations:

- a) to qualify an **ENTIRE SENTENCE** (a comment about it) ***Luckily, no one was hurt.***
- b) to qualify an **ACTION** or **VERB** (how was it done?) ***He quietly stood up.***
- c) to qualify an **ADJECTIVE** (adverb can be replaced by 'very') ***This is extremely stupid!***

In all of these situations they stand directly in front of the thing they describe.

	👎	might not	könnte (vielleicht) nicht „We might not make it.“	

Modal Verbs – Usage

► will / won't (past: would / wouldn't)

- ➞ This is one of the auxiliary verbs used to build **future time** forms; it **does not mean “wollen”** anymore, except sometimes when “won’t” (*werde/will nicht*) contrasts with “can’t” (*kann nicht*). For “wollen”, use the normal verb “**want to**”.

► can / can't (past: could / couldn't)

- ➞ Used mostly for the same things as in German, the biggest difficulty here is that there is **no infinitive** form for it (*können*). We can also use it to mean “it is (not) allowed”, as in: “*You can't drive here; it's illegal!*”
- ➞ In order to build the future, you have to use “**be able to**” (“*I won't be able to come to your party tomorrow.*”).

► must / mustn't (past: had to / didn't have to)

- ➞ When you say “you must” (“*You must come visit us some day!*”) you personally feel it is **very important to do** it; for rules and laws, we tend to use “you have to” instead.
- ➞ One context where the verb “must” is still often used is **suppositions** (Annahmen), as in: “*You've been working all day; you must be tired by now.*” — “*Yes, I am.*”
- ☛ Careful: **mustn't** (“**darf nicht**”) ≠ **don't have to** (“**muss nicht**”)!

► have to / don't have to (past: had to / didn't have to)

- ➞ Used for **rules and laws** (“*You have to drive on the left in Britain.*”). Since there is no past form or infinitive of “must”, we use “have to” as a **replacement for missing forms of “must”** as well (“*I had to get up so early yesterday; I'm still tired.*”; or: “*I realised I really had to lose some weight.*”)

► shall / shall not (past: should / shouldn't)

- ➞ While “shall” is most often used for **questions about what to do** (“*Shall I help you with that?*”), the past form “should” is the normal go-to verb for **giving someone advice** (“*You should see a doctor.*”). Instead of “should” we can also say “**ought to**” (“*You ought to see a doctor.*”)

► may / may not (past: might / mightn't)

- ➞ We use “may” in **polite questions** when asking for permission (“*May I go to the toilet?*” / “*May I sit here?*”). It is also used for talking about **likely, but uncertain** things in the future (“*It may rain later tonight.*” — “*Maybe, yes.*”).
- ➞ The past form “**might**” means “**will perhaps**”, and is used for **things that could happen** but are not necessarily likely to (“*I might go to Canada next year, but I don't know yet.*”)

Modal Verbs – Difficulties

The modal verbs in English are really **crippled ruins** of older, more complex verbs. Today, they only have a few verb forms left, since all other **forms have died away**.

Modal verbs do not have an **infinitive** (cf. German: *können*), and they do not have a **past participle** (cf. German *gekonnt*). Most only have a present and a past form. The most extreme case is *must*, which does not even have a Past Tense anymore (cf. German: *musste*).

This means that we cannot use modals for the Future (*will / going to* + **INFINITIVE**) or for the Perfect (*have* + **PAST PARTICIPLE**). So we use **alternative constructions** for the most important modals:

can	<i>Present</i>	<i>Past</i>
	He can swim well.	He could swim well.
	<i>Present Perfect</i>	<i>Future</i>
	He has been able to swim for years.	He will be able to swim soon.

must	<i>Present</i>	<i>Past</i>
	He must work harder.	He had to work harder.
	<i>Present Perfect</i>	<i>Future</i>
	He has had to work harder lately.	He will have to work harder.

Speculation: **must have done / should have done / could have done, etc.**

Sometimes we look at **past situations** and wonder what they most likely were like. For this kind of **speculation** we often use a normal modal verb plus a kind of infinitive (the **past infinitive**) built with *have* + **PAST PARTICIPLE**:

The prisoners are not here anymore.	→	They must've escaped!
Perhaps they found a way out.	→	They could've found a way out.
Why didn't they stay inside?	→	They should've stayed inside!

careful: we pronounce these as if they were followed by *of* and not by *have* ("mustev", not "must have")

Constructions that serve the same functions as modals:

ought to [o:t tu]	=	<i>sollen</i>	"You ought to help him, you're his brother!"
be supposed to	=	<i>sollen</i>	"You were supposed to be here at ten!"
be allowed to	=	<i>die Erlaubnis haben</i>	"I am not allowed to drive a car."
be able to	=	<i>können, fähig sein</i>	"Holmes wasn't able to solve the mystery."
have to	=	<i>müssen (offiziell)</i>	"In England you have to drive on the left."
need to	=	<i>brauchen, müssen</i>	"You need to pull yourself together and do it!"
